THIS IS UNEVALUATED INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

1. The Karl Marx Werke, Babelsberg (formerly Orenstein und Koppel), has completed one model of a power station for use on narrow gauge (750 mm.) tracks. This has been dispatched to Leningrad. Unlike earlier models which featured an 80 h.p. wood burning steam engine this unit consists of a wood-gas generator, and an 80 h.p. combustion engine. This drives an electric generator, as did the earlier models. The complete equipment is mounted on a special truck and hauled by a small locomotive. Tests carried out at Babelsberg have proved highly satisfactory.
2. It is believed at Babelsberg that this equipment is designed for mobile wire-  
less stations.
